# **Atama GDPR Compliance statement**

Academia have assessed compliance for our cloud infrastructure to GDPR against the CISPE Code of Conduct, which is available here: <https://cispe.cloud/code-of-conduct/>.

We've updated our multiple ISO Standards (9001, 14001, 27001 and 27017) documentation with a series of control measures against the CISPE Code of Conduct and we continually check these through our risk assessment processes. In April, we completed an external auditor led reassessment of our compliance to all four ISO standards, and retain full certification.

As an Academia customer, we'll soon be asking you to choose how you'd like to receive updates from us on Technology News, Features, Events, Promotions and latest Product announcements. For example, if you come to our Technology Education Events, you'll soon be asked to confirm your choice to continue to receive information relevant to you. There will also be other opportunities when you speak to us in the coming months to let us know your preferences. We've provided more detail in a blog post here: <http://academia.co.uk/taking-control-of-how-we-use-your-data/>

In summary, Academia can confirm full compliance with GDPR standards in relation to all data we hold, process or control on behalf of our customers. If you have any questions, please feel free to get in touch.
